

Adopt A Tree

Trees make a difference in our City, and so can you!
We're looking for community members to adopt the new oak trees that will be planted along Edmundson Creek.

As a part of this program, community members will commit to watering their adopted tree for five years. The first two years of participation would require watering every 3-4 days.

On watering day, participants can bring water to the tree by using 5 gallon buckets. A watering guide will be provided to program participants.

These new trees will be replacing 17 pine trees that are scheduled to be removed for safety reasons.
